This diagram shows an exploded view of a rear suspension component. The main part is a metal bracket (1) with a curved shape. A coil spring (3) is shown to the right, aligned with a hole in the bracket. Two shock absorber mounting brackets (2) are shown at the top and bottom, each with a bolt and nut. The top bracket (2) is positioned to attach to the top of the bracket (1), and the bottom bracket (2) is positioned to attach to the bottom of the bracket (1). The shock absorbers are represented by curved lines extending from the brackets.

The diagram shows an exploded view of a steering gear assembly. The main component is the steering gear housing, which has several ports and mounting points labeled with circled numbers:

- 1**: Points to the top cover/seal area.
- 2**: Points to a port or seal on the side.
- 3**: Points to a mounting bracket or arm attachment point.
- 4**: Points to another mounting bracket or arm attachment point.
- 5**: Points to a long threaded rod/bushing used for mounting.
- 6**: Points to a spacer or mounting plate.
- 7**: Points to a U-bolts or clamps used for mounting.
- 8**: Points to a lock washer.
- 9**: Points to a nut used for the steering gear arm.

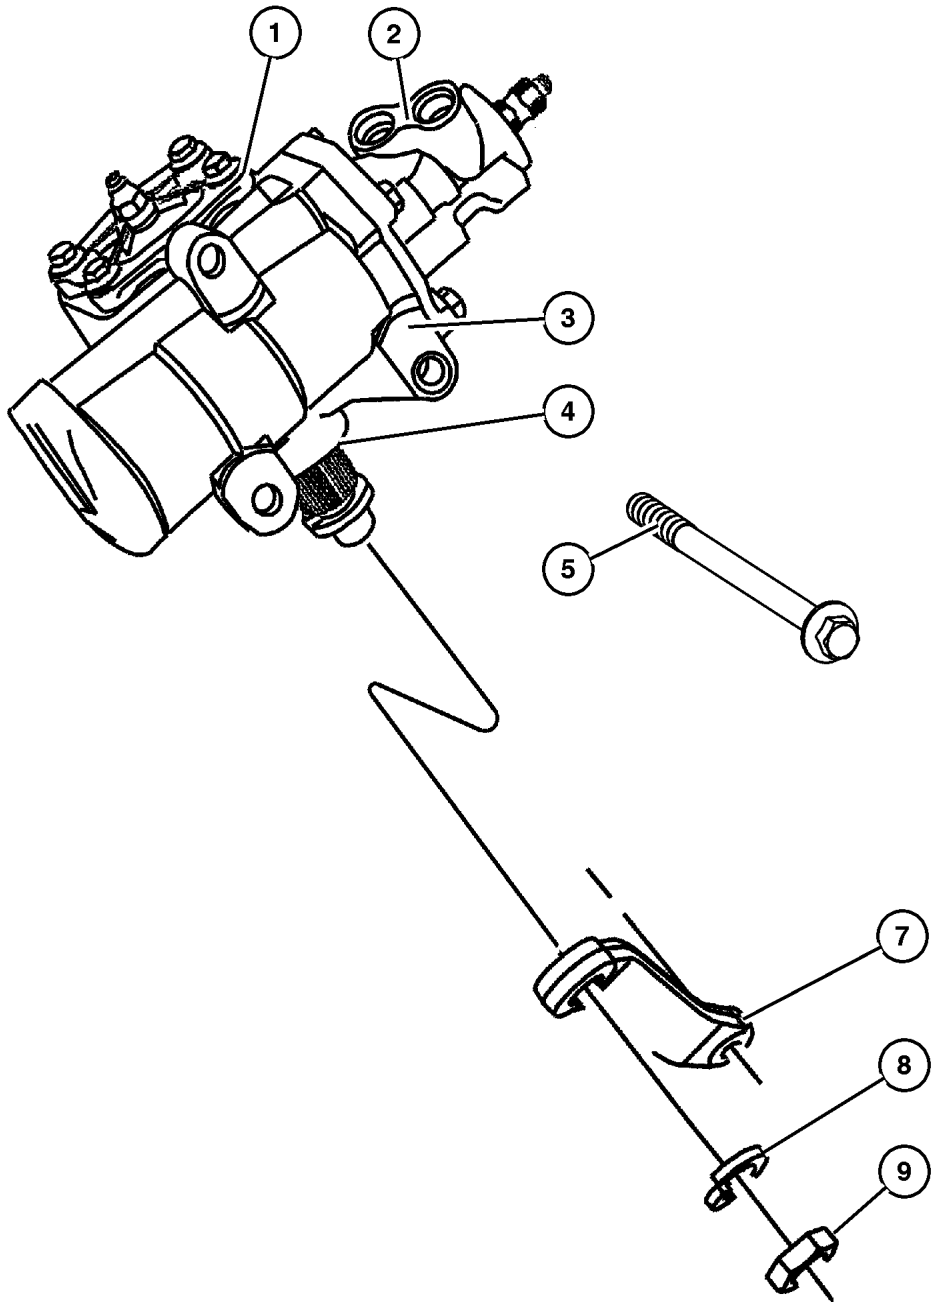

The assembly includes various seals, gears, and mounting hardware as detailed in the parts list below.
